Package Performance (Long)

The algorithm correctly predicted 10 out of 10, 100% accuracy, of the suggested trades in the By Region – European Stocks Package for this 3 Months forecast. The greatest return came from AMS.S at 39.98%. NMC.L and PLOF.PA also performed well for this time horizon with returns of 26.54% and 25.45%, respectively. The package had an overall average return of 14.91%, providing investors with a 10.99% premium over the Euronext 100 return of 3.92% during the period.

ams AG is an Austria-based company active in the semiconductors industry. It designs and produces integrated analog microchips and offers services and consulting in the areas of power management, sensors, sensor interfaces and mobile entertainment. The Company provides its products and services to customers in the communications, industrial, medical technology and automotive markets. The Company divides its activities into two business segments: Products and Foundry. The Products business segment consists of Consumer and Communications, Industry and Medical, as well as Automotive market areas and manufactures sensors, such as complementary metal-oxide-semiconductor (CMOS) sensors for environmental data. The Foundry business

segment comprises the Full Service Foundry area that offers contract manufacture of analog integrated circuit (IC) technologies. The Company operates subsidiaries in Europe, the United States, Japan, India, China, Korea and the Philippines.

Algorithmic traders utilize these daily forecasts by the I Know First market prediction system as a tool to enhance portfolio performance, verify their own analysis and act on market opportunities faster. This forecast was sent to current I Know First subscribers.

[How to interpret this diagram](#)

Algorithmic Stock Forecast: The table on the left is a stock forecast produced by I Know First's algorithm. Each day, subscribers receive forecasts for six different time horizons. Note that the top 10 stocks in the 1-month forecast may be different than those in the 1-year forecast. In the included table, only the relevant stocks have been included. The boxes are arranged according to their respective signal and predictability values (see below for detailed definitions). A green box represents a positive forecast, suggesting a long position, while a red represents a negative forecast, suggesting a short position.

Please note-for trading decisions use the most recent forecast.
